OBJECTIVE

Data Engineer and ETL Developer with over 4 years of experience in building, maintaining, and optimizing data warehouse and ETL solutions. Skilled in IBM InfoSphere DataStage, Teradata SQL, and Oracle PL/SQL, with a strong focus on delivering reliable, high-quality data solutions. Looking to contribute my technical skills and problem-solving abilities to help organizations make better data-driven decisions while continuing to grow in cloud technologies and modern data engineering.

PROFESSIONAL SUMMARY

- **4+ years** of progressive experience in **Enterprise Data Warehousing (EDW)**, **ETL Development**, and **Production Support** for large-scale enterprise applications.
- Expertise in designing and maintaining scalable **ETL pipelines** using **IBM InfoSphere DataStage**, processing millions of records daily across multiple environments.
- Strong proficiency in **SQL**, **Teradata**, and **Oracle PL/SQL** with proven ability to optimize complex queries and stored procedures, achieving **30% performance improvement**.
- Hands-on experience in **cloud migration** (DataStage to Google Cloud Platform), **workload consolidation**, and **impact analysis** for enterprise data warehouse environments.
- Expert in **production support**, **batch scheduling** using Tivoli Workload Scheduler, and ensuring **99.9% uptime** for critical ETL jobs.
- Proficient in **version control** (Git/GitLab), **CI/CD** deployment across DEV/UAT/Production, and **Agile Scrum** methodologies.
- Strong communicator with excellent problem-solving skills and ability to collaborate effectively with cross-functional teams and stakeholders.
- Proven track record of delivering high-quality solutions with **10/10 Client CSAT** and recognition for exceptional performance.

TECHNICAL SKILLS

ETL & Data Integration: IBM InfoSphere DataStage, Data Integration, ETL Development, Data Warehousing, Data Migration

Databases: Teradata, Oracle, SQL, Oracle PL/SQL, Stored Procedures, Query Optimization

Cloud Platforms: Google Cloud Platform (GCP), Cloud Storage, Cloud Migration

Version Control & DevOps: Git, GitLab, CI/CD, Deployment Automation

Operating Systems: Unix, Linux, Shell Scripting

Scheduling & Monitoring: Tivoli Workload Scheduler, Production Support, Batch Processing, Control-M

Other: SFTP, Impact Analysis, Agile, SDLC, Change Management, Data Quality, Testing

EDUCATION

St. Ann's College of Engineering and Technology
B.Tech in Computer Science and Engineering

Chirala, India
2018 – 2022

CERTIFICATIONS

- **Databricks Certified Associate Data Engineer**
- **Python Certification**
- **Google Cloud Professional Certification**

PROFESSIONAL EXPERIENCE

CGI

ETL Developer — *Client: Bell Canada*

Hyderabad, India

Aug 2022 – Present

- Architected and developed scalable **ETL pipelines** using **IBM InfoSphere DataStage**, processing over 50+ million records daily for enterprise data warehouse applications with **100% data accuracy**.
- Optimized complex **SQL queries** and **Oracle PL/SQL stored procedures**, reducing execution time by **30%** and improving overall system performance.
- Spearheaded **workload consolidation** initiatives by performing comprehensive **impact analysis** on 200+ DataStage jobs, database objects, and dependencies, resulting in **25% reduction** in cloud storage costs.
- Led **DataStage to Google Cloud migration** activities, validating 150+ ETL workflows, analyzing dependencies, and ensuring seamless migration with **zero business disruption**.
- Designed and implemented secure **SFTP-based file ingestion** workflows, ensuring **100% data integrity** and compliance with enterprise security standards.
- Managed **production support** for critical ETL jobs using **Tivoli Workload Scheduler**, maintaining **99.9% SLA compliance** and resolving issues within defined SLAs.
- Orchestrated code deployments across **DEV, UAT, and Production** environments using **Git/GitLab**, ensuring seamless releases with **zero production issues**.
- Collaborated in **Agile Scrum** teams, delivering features within sprint timelines and actively participating in daily stand-ups, sprint planning, and retrospectives.
- Mentored 3+ junior developers on DataStage best practices, SQL optimization, and ETL design patterns, improving team productivity by **20%**.
- Implemented automated **data quality** checks and validation frameworks, reducing data errors by **40%** and improving overall data reliability.

Key Achievement: *Received 10/10 Client CSAT for exceptional ETL solution delivery and successful project execution.*

PROJECTS

• End-to-End Data Pipeline with Python, GCP & Databricks

- Architected a scalable data pipeline using **Python**, Google Cloud Storage, BigQuery, and **Databricks**, processing 10+ GB of data daily.
- Implemented ETL processes using **Apache Spark** for distributed data processing, achieving **5x faster** data transformation.
- Automated data ingestion and transformation workflows with scheduling and monitoring, reducing manual effort by **70%**.

• Data Warehouse Migration Assessment Tool

- Developed a **Python** script to analyze DataStage job dependencies and database object usage across 500+ objects.
- Created automated impact analysis reports for cloud migration planning, reducing assessment time by **60%**.
- Enabled data-driven migration decisions by providing comprehensive dependency mapping and risk analysis.

• Real-time Data Ingestion Pipeline

- Built an automated **SFTP** file ingestion system processing 100+ files daily with validation and error handling.
- Created monitoring dashboards for pipeline health using Prometheus and Grafana, ensuring **99.9% availability**.
- Implemented automated alerting mechanisms, reducing incident response time by **50%**.

ACHIEVEMENTS

10/10 Client CSAT – Received highest client satisfaction score for exceptional ETL solution delivery and project execution

Cost Optimization – Identified and decommissioned 25+ inactive database objects, reducing cloud storage costs by 25%

Performance Improvement – Optimized SQL queries and stored procedures, achieving 30% reduction in execution time

Process Automation – Automated manual validation tasks, saving 5+ hours per week per team member

Knowledge Sharing – Conducted 5+ internal training sessions on DataStage, SQL optimization, and ETL best practices

Zero Production Incidents – Maintained 100% successful deployment record with zero production issues over 12+ releases

ADDITIONAL INFORMATION

Interests: Data Engineering, Cloud Computing, Big Data Analytics, Machine Learning, Open Source Contributions

Languages: Telugu (Native), English (Fluent - Professional Working Proficiency)

Awards: Recognized for Outstanding Performance and Client Delivery Excellence at CGI
